Working with Foresolutions

Welcome to Foresolutions, your trusted business communications, asset tracking and IoT partner.

In a nutshell, we help businesses keep on track of their operations efficiently through a range of technology. Our goal is to make tech a joy to work with through a joined up offering of flexible communications solutions, asset tracking and IoT. Whether used concurrently or independently, each aspect will take you on a road to more streamlined processes, provide accurate knowledge of all your valuable assets and ultimately better results from your investment to improve business performance.

We focus on delivering a great experience, not just products and services. Making technology better for business and the people using it is vitally important, which is why we spend time getting to know you and the way you like to work. Our approach involves an initial discovery process where we explore your objectives and current operational setup in order to present the most suitable route, whether that be for a basic two-way radio system, an off the shelf asset tracking solution or a custom “built for you” IoT project.

Company History

Foresolutions, in its original form, was founded in 1979 and is still today a family run business. We are located on the south coast of England and have grown to service a national network of customers for a range of products spanning business communications, asset tracking and IoT solutions.

Foresolutions has, until relatively recently, been predominantly a communications solutions business. In 2016 we started working with Asset Fusion on asset tracking projects, developing the Foretrack Connect SaaS product. This brings us up to the present day where in 2020 our fully fledged merger with Asset Fusion has given us a unique position whereby we now have our own asset tracking and IoT development platform. We can now offer our customers a complete “built for you” approach. No more being constrained by pre-defined configurations and inflexible plans, with us you get exactly what you need.

Today
Providing Services and Solutions across business and critical comms, asset tracking and

Business Communications Solutions

A range of technology options that keep you connected whatever your location and business model. We offer business mobiles, two-way radios, body cams, wireless comms, Push-To-Talk over Cellular (PTToC) and drone surveillance.

A range of tech tailored to you - all work independently or as a more integrated solution

Two-way radio for instant, secure communication between colleagues.

Body worn cameras

for peace of mind, evidence capture & safety monitoring.

Hearing Protection...

Mobile & Push-To-Talk Over

Cellular devices offer multi-site & remote worker solutions.

Communicate in a timely, efficient manner to keep your operations running smoothly

Foresolutions is one of the most trusted companies for the long-term hire and sales of two-way radios and body worn cameras in the UK. From this we have grown to offer a suite of additional solutions utilising the latest technology that works when and where you need it.

Ensure your security & facilities management staff feel safe and have constant communication with colleagues when they need it most.

Whether you require one unit for a lone worker, or you need to kit out a squad of stewards and event security staff, we can help.

Our bespoke packages of body cams and two-way radios have been successfully utilised by clients all over the country from shopping centre security guards to Silverstone, V Festival and O2 Arena.

Sectors we work with

Every business needs to communicate, and our primary goal is to offer a range of solutions to help you operate more efficiently. Sectors who have benefited from our solutions include:

- Construction
- Education
- Retail & Shopping Centres
- Mining, Oil & Gas
- Event Management
- Outdoor Leisure & Holiday Parks
- Healthcare
- Public Transport

Example Use Cases

Business communications technology is all about creating a better way of transferring information. We've helped or clients improve the following areas with the correct solution deployment:

- People monitoring
- Traffic volumes
- Remote worker communication
- Remote worker safety alerts
- Queue monitoring
- Crowd control
- On-site secure colleague comms
- Digital voice recording
- Noise protection
- Customer & colleague interaction capture
- Training

Our simple approach will get you connected quickly and easily

Initial no-obligation intro call

We'll ask you some questions about your business and key priorities to help us find the right solutions.

Personalised Proposal

We'll send you an outline proposal of our recommended solution to address your requirements.

Set-up, despatch & connect

Once the proposal is agreed we'll process your hardware order and any contractual plan.

Asset Tracking Solutions

Benefit from better operational efficiency and enjoy cost savings through seamless asset management with real-time status alerts and accurate, timely data. Whether it's indoors or outdoors, you name it, we can track it!

Get on top of your assets and head off potential issues before they become a costly or potentially dangerous problem

Still on the fence about whether to invest in an asset tracking solution? What would it mean to rid your business of the added time, cost and potential risks involved in having to rely on manual processes to run your operations?

Whether it's vehicle tracking, tool tracking, plant equipment tracking, hire bicycle tracking at a holiday park or even a set of keys, knowing where your valuable belongings are is pretty vital when you're busy organising jobs.

If you're currently having to fork out to hire or buy replacements when assets go missing, get stolen or break down unexpectedly from misuse, asset tracking can help you monitor usage, see live locations and potential threats before they become a problem.

Our Foretrack Connect SaaS asset tracking software is quick to install and fully customisable to work with a wide variety of trackers and can be set up with custom alerts bespoke to your requirements.

Say hello to slick inventory management, a safer working environment & operational efficiencies with Foretrack Connect

Improve customer service - update your customers in real time to offer superior service levels.
Reduce unforeseen operational

costs with better inventory management.
Use asset tracking to meet safety and compliance standards

across your operations.

Our asset tracking solutions are designed to improve business performance whilst fitting easily into your operations

Our bespoke tracking packages are powered by innovative hardware, intelligent software and a knowledgeable team, allowing you to not only make the most informed choice for your business, but remain in control thanks to our dedicated in-house support.

Our promises

- Super quick install within 5 days
- Money back 100% satisfaction guarantee
- Lifetime hardware warranty
- Flexible contracts

Asset Tracking Use Cases

Whilst many people just think vehicles when we talk about GPS tracking, there is so much more to today's asset tracking capabilities. Whilst traditional GPS tracking is still a major part of our portfolio, other technologies such as Bluetooth trackers are providing additional functionality for flexible indoor and outdoor settings. Here's a summary of our various solutions:

- Vehicle tracking
- Fleet management
- Trailer tracking
- Plant machinery tracking
- General asset tracking
- Carrier refrigeration
- Lone worker protection

Our simple approach will get you connected quickly and easily

Initial no-obligation intro call

We'll ask you some questions about your business and key priorities to help us find the right solutions.

Personalised Proposal

We'll send you an outline proposal of a solution that addresses your key pain points pitched at your specified user profiles.

Set-up, despatch & connect

Once the proposal is agreed we'll progress with the tracker installation, software set-up and any customisations.

IoT Solutions

The Internet of Things (IoT) is simpler than it sounds. Put simply it's a catch-all term for the growing number of electronics that are connected to the internet to send data, receive instructions or both.

We like to talk about "Connected Business".

Enjoy reliable, timely insights to better manage your operations

The information collected can be used to improve decision making, solve a business problem or optimise a process or an asset. IoT technology does this through measuring things in the physical world (often using sensors) and generating data that can be processed, interpreted and presented in a useful way. Businesses can benefit across a wide variety of areas from an IoT solution. From small businesses looking to manage a single site right up to enterprise level, we can design a solution to suit.

IoT technology can be designed to work across the following use cases in multiple sectors, there are just too many to list!

- Managing assets
- Condition monitoring
- Misuse of spaces
- Temperature Monitoring
- People counting

Get started straight away with our instant IoT kits, or go bespoke!

The Fastest Path to Microsoft Azure IoT

With our instant IoT kits, you can have an application live in Azure IoT Central in a matter of minutes.

Build dashboards, create real-time alerts, and run analytics reports using the data from the sensors and gateway included in your kit- no coding required!

More complex needs? No bother.

Fast track the creation of a custom solution using our IoT platform and innovative open Web API.

- Market leading Microsoft Azure IoT solutions provider
- Both traditional and 'next gen' innovative voice and messaging
- Template solutions for many innovative use cases in IoT, tracking and communications to fast track deliveries

Example IoT Use Cases

The Fastest Path to Microsoft Azure IoT

- Building and structure monitoring - Temperature, air quality, presence, occupancy, energy, noise, door opening, weather and environmental conditions
- People tracking, safe distancing
- Security and access control - CCTV, Entry/Exit
- Space, room even desk occupancy
- Way finding and indoor tracking
- Asset Utilisation
- Temperature and Humidity
- Air Quality
- Levels and Flows
- Alarms, Alerts

IoT Solutions benefit so many different industries

Sectors we work with

Our IoT solutions can be utilised across a wide variety of sectors. Here are a few of the different areas we've worked with:

- Aviation
- Cold Chain
- Construction
- Events
- Healthcare
- Housing Associations
- Logistics
- Ports
- Restaurant
- Retail
- Shopping Centres
- Transport

We work with you to get you on the right path to your ideal solution

Accelerator Service & Demo Kits

A simple process to work with our experts and explore the opportunities and benefits to your organisation.

Instant Kits & Foretrack Connect SaaS

Select the right devices and options and subscribe to our extremely competitive off-the-shelf cloud solution.

A Custom Built-For-You Solution

Fast track the creation of a custom solution using our IoT platform and innovate open Web API.

Automate your business processes and make informed decisions

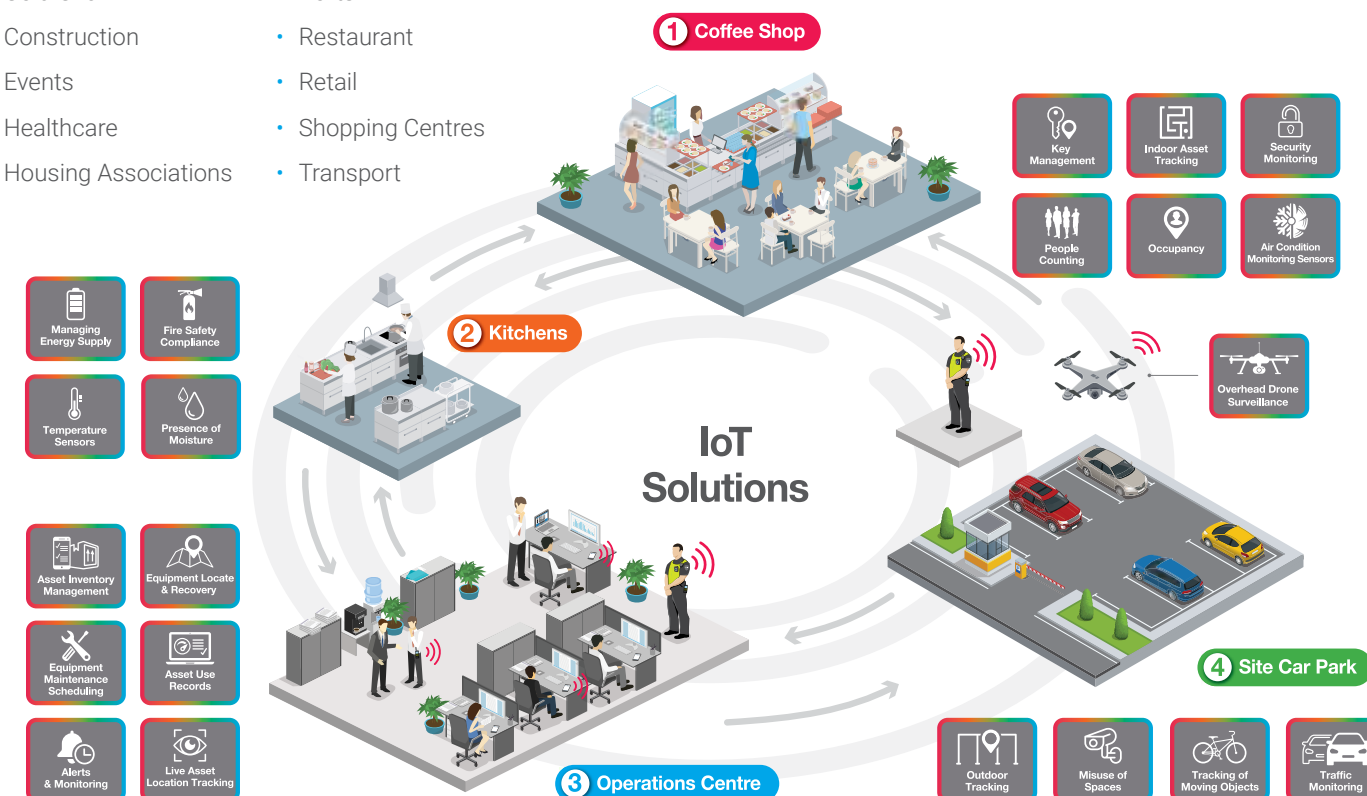

Detect potential issues before they become costly problems.

Provide a safer, compliant environment for your people.

Better understand the status of assets to improve processes.
